

Office of Children's Services
Empowering communities to serve youth

Virginia Children's Services Act (CSA)

Serving Virginia Families Through a State
Supervised, Local Administered System of Care

Scott Reiner, Executive Director
Virginia Office of Children's Services

Virginia Commission on Youth
October 19, 2022

The Challenge:

- Aligning policy, practice, and funding with the challenges and realities facing children and families
- Multi-layered, often “siloesd” systems
 - State government and local implementation (where the “rubber meets the road”)
 - Various public child-serving agencies at both the state and local level
 - Professionals and impacted persons (children/families)
 - Public and private service providers

The Challenge:

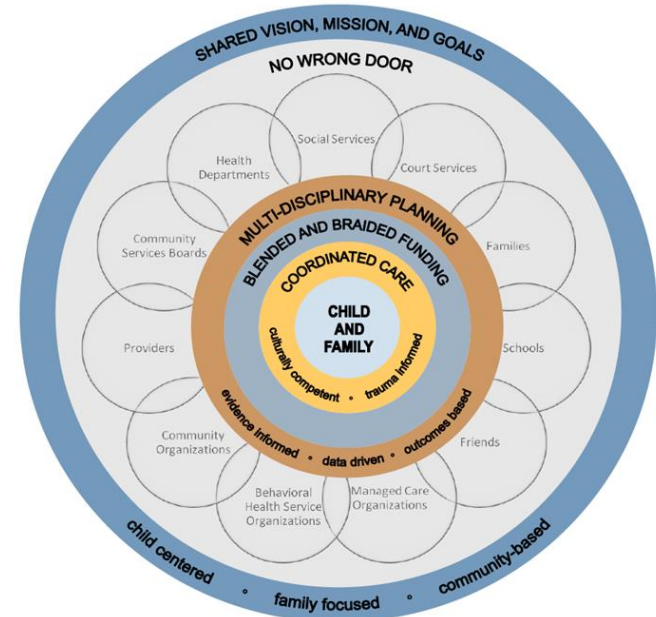

- Over 14,000 “cases” from across four agencies in “deep-end” residential care
- Children and families with significant challenges do not fall into agency silos
- Integration of policy and practice between state child-serving agencies and between the state and local governments in both programmatic and funding domains needed enhancement to improve outcomes

A Rationale for Change

The system in 1990

A Vision of the Future

The Response:

- Leadership: A “mandate for action” from the Governor and the General Assembly
- Dialogue and Consensus: A top-down and bottom up approach involving a “cast of thousands”
- Enactment of the CSA legislation – July 1, 1993
 - Addressed critical issues of governance and funding

The CSA Mission (§2.2-5200, COV)

"... to create a collaborative system of services and funding that is

... when addressing the strengths and needs of trouble and at-risk youths and their families ..."

Effective July 1,
1993

Established a
state supervised,
locally
administered and
operated system

Consolidated
funding from
seven funding
streams and four
agencies (DSS,
DOE, DBHDS,
DJJ) into a single
"state pool"

Created the
structures and
functions to
operate the
program (FAPT,
CPMT, etc.)

Blended Funds

Braided Funds

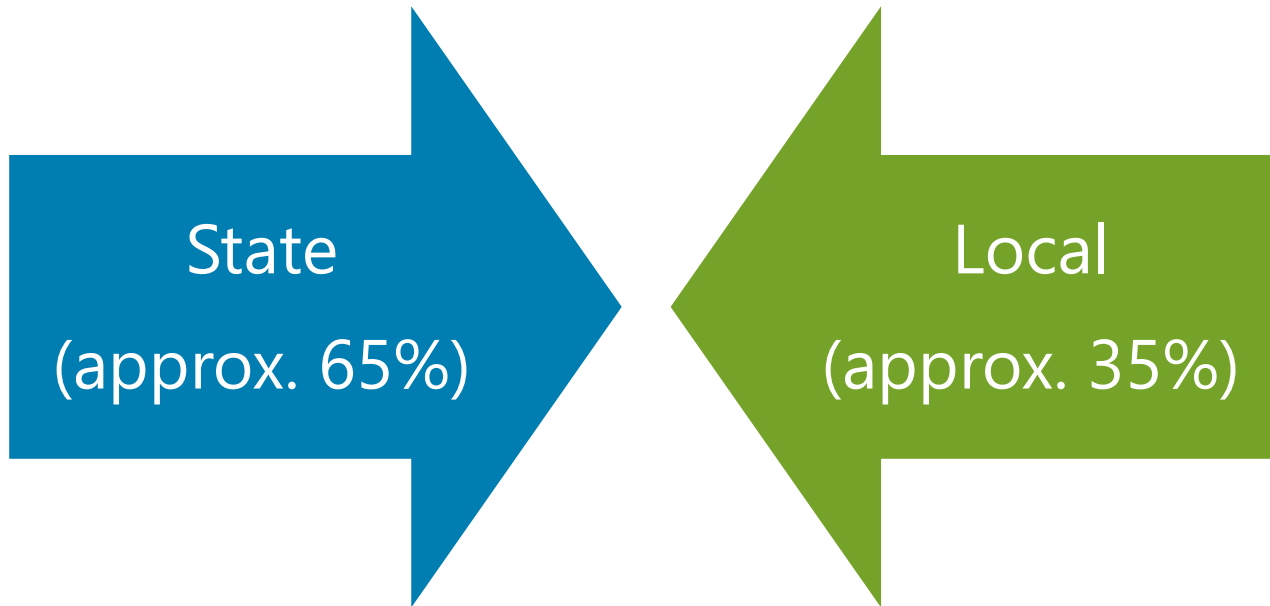

Funds from various sources are used to pay for a service package, but tracking and accountability for each pot of money is maintained at the administrative level.

Braided Funding

- Medicaid (Behavioral Health and Medical)
- Various DSS funds (title IV-E, Family First Prevention Services Act, Chafee, Adoption Assistance, Promoting Safe and Stable Families)
- DBHDS/CSB – Children's Mental Health Initiative
- Department of Juvenile Justice – Virginia Juvenile Community Crime Control Act (VJCCCA)

CSA Funding: A Shared Responsibility

Who Is Eligible for CSA Funding? (§2.2-5211 and §2.2-5212)

- Children receiving foster care services
 - Foster Care Prevention and Non-Custodial Agreements
 - Those in custody of the LDSS
- Students with educational disabilities in private special education programs per their Individualized Education Programs (IEP)
- Children in Need of Services (CHINS)
- Children with significant behavioral/emotional needs involved in more than one agency

What services can CSA fund?

- A full array of community-based services including traditional behavioral health as well as individual and family supports (e.g., mentoring, parent coaching)
- Foster care (public and privately operated), independent living, prevention
- Private day and residential special education tuition and ancillary services
- Congregate care (Psychiatric Residential Treatment Facilities, group homes)

CSA Expenditures and Utilization

Source: CSA Pool Fund Reimbursement and LEDRS Systems

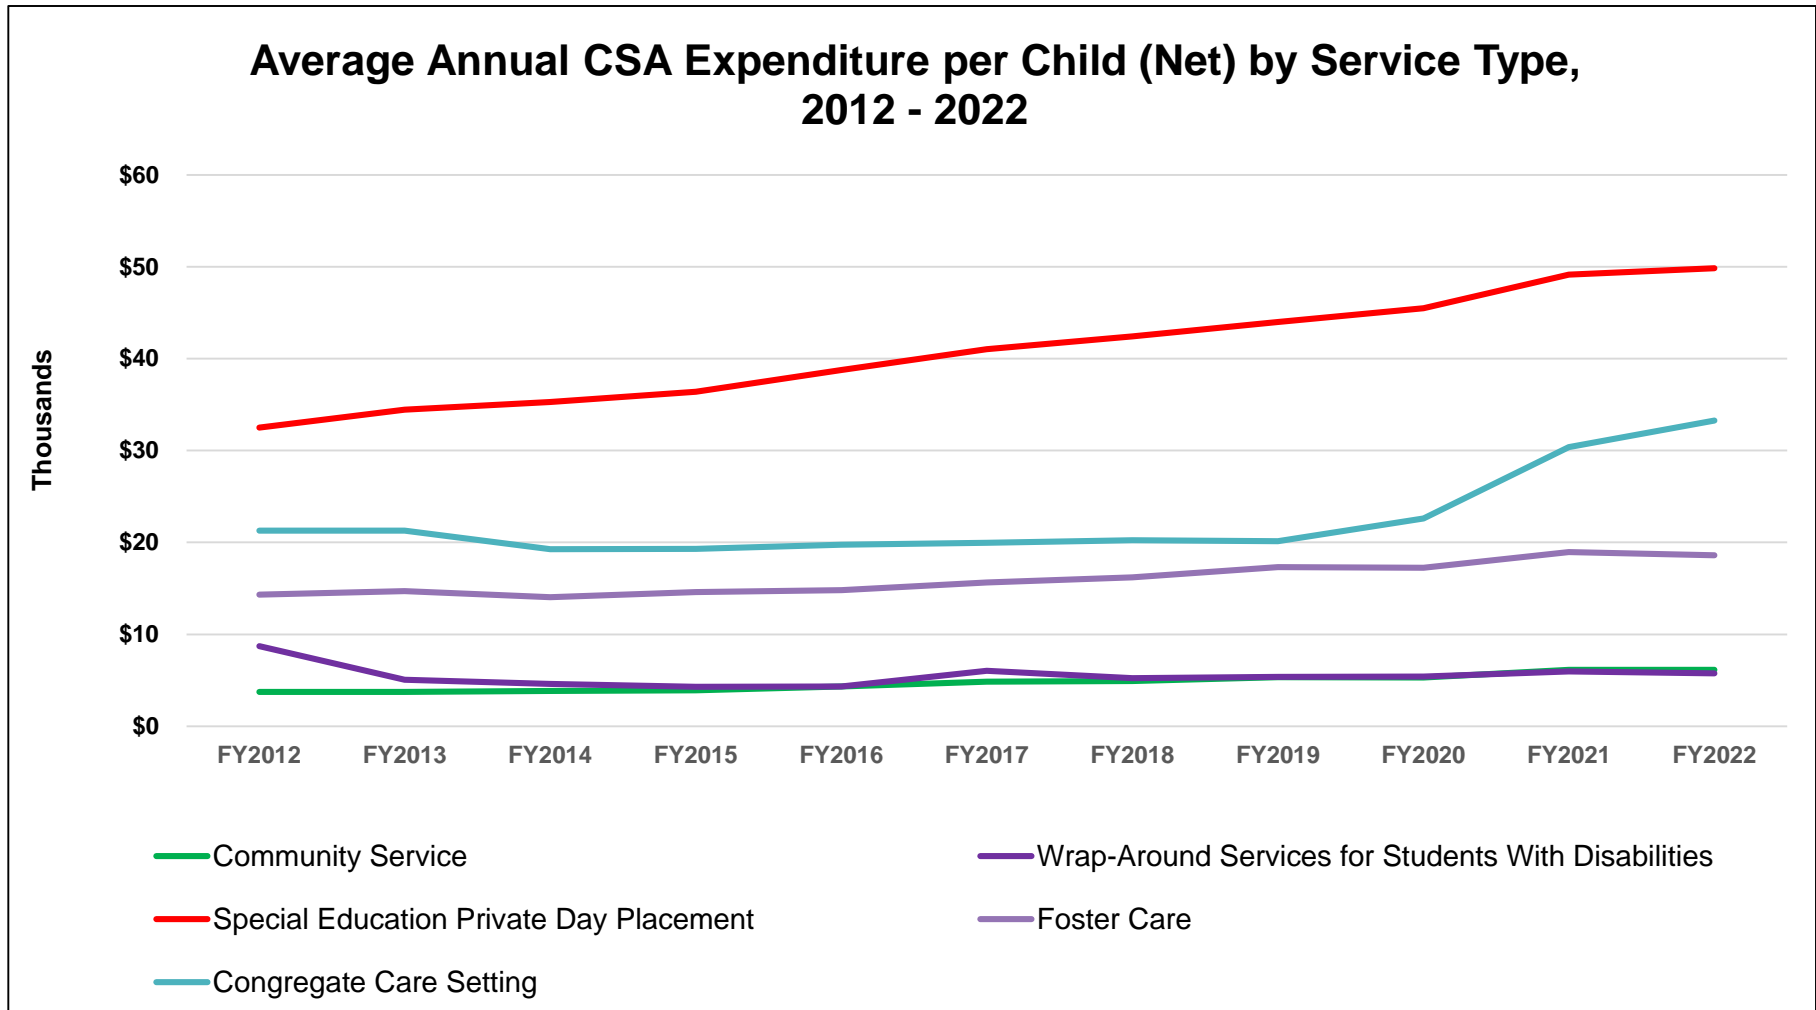

CSA Expenditures and Utilization

CSA Expenditures (Net) by Type 2012 - 2022

CSA Expenditures and Utilization

Average Annual CSA Expenditure per Child (Net) by Service Type, 2012 - 2022

CSA: A locally administered program

- Family Assessment and Planning Team (§2.2-5207)
- Membership
- Nine statutory powers and duties including:
 - family engagement
 - collaborative assessment to identify needs
 - creation of an individual family service plan (IFSP)
 - monitoring, review, adjustment of services

CSA: Local Structure

- An identified CSA Coordinator (administrator)
 - Main point of contact
 - May be “housed” in the local DSS, local government, or another agency (rare)
- Depending on the size of the locality, the CSA office may be a “one-person” operation or may have multiple staff in various roles (e.g., fiscal, utilization review, FAPT Coordinator)
- Each child has an assigned agency case manager

The FAPT Process

- Referral
 - Through any one of the member agencies for a child/family already known to them (e.g., Child Protective Services case, youth on probation, student with an IEP)
 - Some children “automatically” get referred due to funding considerations (child placed in foster care, student with an IEP for private day special education)
 - Direct parent referral
 - May be “screened” by staff in the CSA office
 - May be referred to an agency (likely the CSB) for case opening and referral
 - Scheduled for a FAPT meeting
 - Frequency of meetings ranges from one per month to multiple per week
 - Wait times may vary

The FAPT Process

- Eligibility determination
 - A child/family are determined eligible, there is no statutory eligibility for specific services except for certain foster care services or IEP-specified private special education
- Assessments
 - Child and Adolescent Needs and Strengths (CANS) is the mandated assessment for all youth and families receiving CSA-funded services
 - Other information available to the “referring” agency/case manager

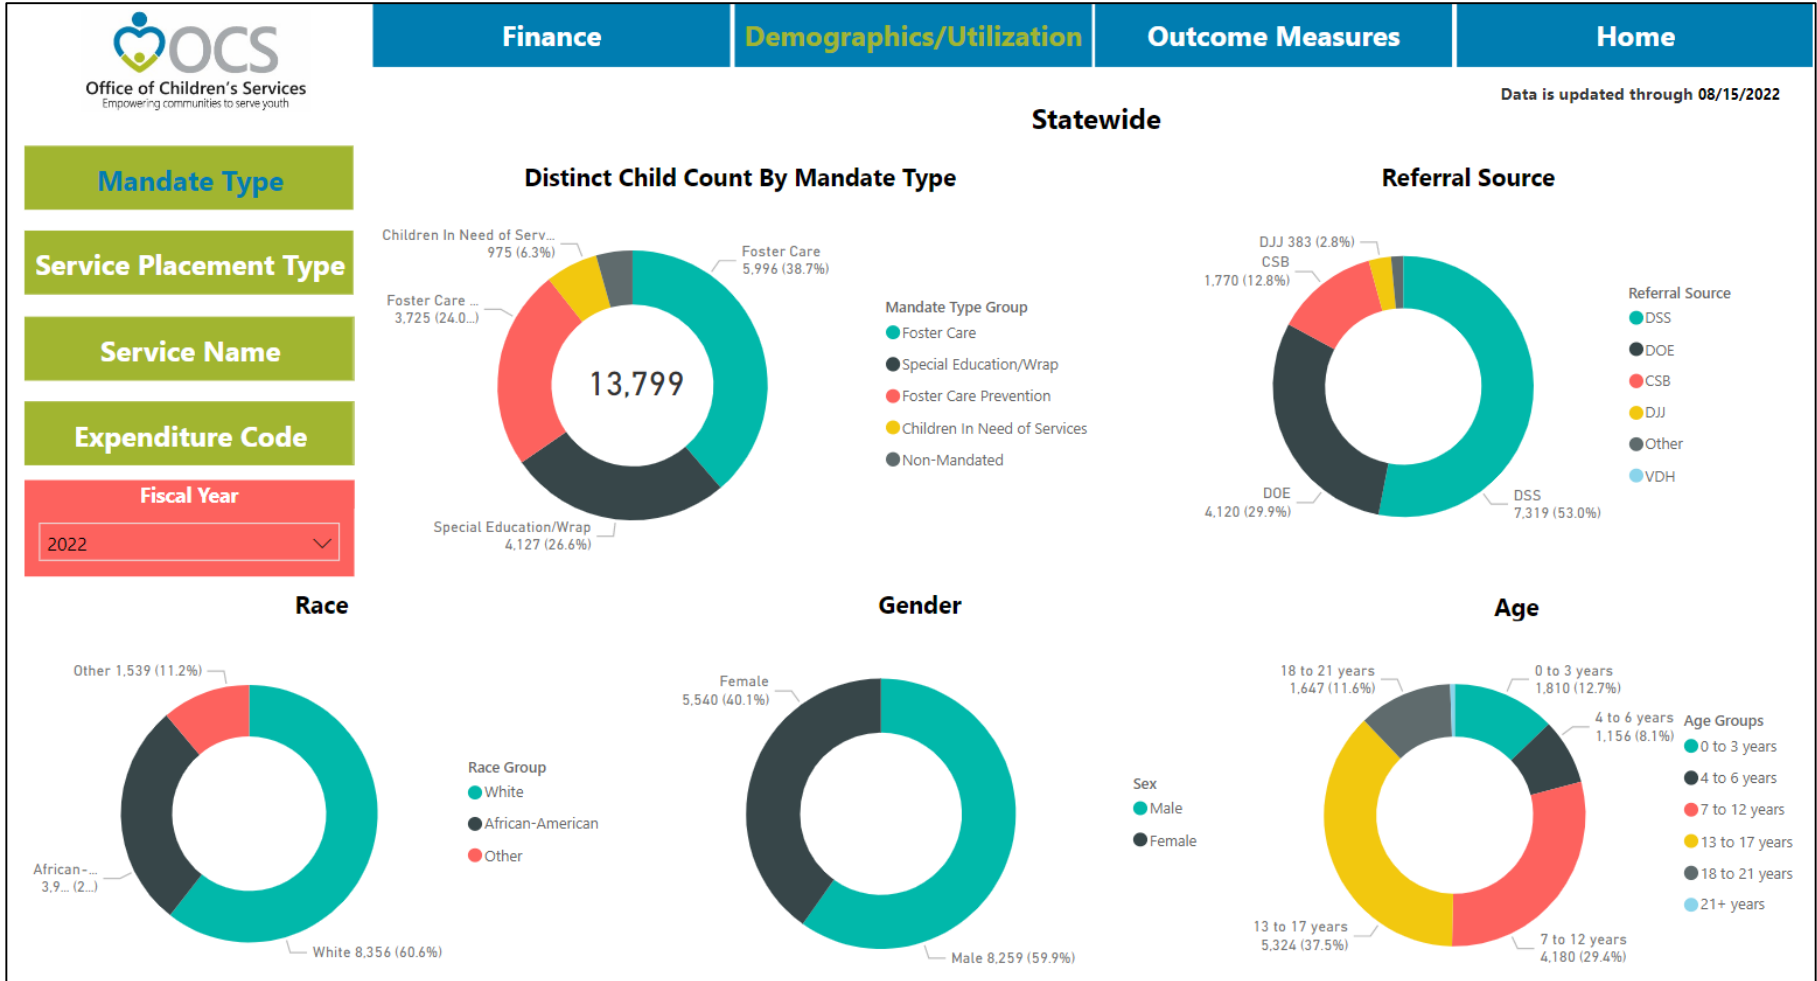

CSA: A locally administered program

- Community Policy and Management Team
(\$2.2-5206)
- Membership
- Eighteen statutory powers and duties including:
 - planning and policy development
 - fiscal and programmatic management
 - data collection and reporting
- Typically meet monthly and must authorize expenditure of CSA funds

Becoming a Data-driven and Outcomes-informed System

- Integrated, child-specific expenditure and service utilization system (LEDRS)
- Standardized assessment instrument, administered at repeated intervals (CANS)
- Regular outcomes reporting at both the state and local level
- Public-facing dashboards of expenditures, service utilization and outcomes reporting with the ability to disaggregate data by referral source and key client characteristics (age, race/ethnicity, sex)

CQI Dashboard

Data is updated through 08/15/2022

Lessons Learned

- Partnerships at all levels require constant attention and cultivation
 - State agency ↔ State agency
 - State government ↔ Local government
 - State and local governments ↔ Private providers
- Laws and policies need to keep up with changing service populations, practice models and trends
- Need for data and outcomes informed practices to be a core component, not an afterthought
