Identified Issues

Background

- The *Collection* is a resource for providers, families, and other entities and individuals who work with children and adolescents who have mental health treatment needs. The *Collection* was originally published in 2002 and is updated biennially with the assistance of an advisory group of experts pursuant to Senate Joint Resolution 358 (2003). Since its original publication, the *Collection* has been widely used and distributed.
- The intent of the *Collection* is to spread knowledge and awareness about evidence-based practices in the field of child and adolescent mental health. Identifying which treatment modalities are supported by scientific evidence helps families, clinicians, and other mental health decision-makers make informed choices.
